

Bowranda™ Roofs

A **Lifestyle** Choice

Your outdoor living space, a place to put your feet up and unwind, a place to reflect on the day, a place to give you that sense of being outside while still being comfortable, a place to entertain. Bowranda™ allows you to do all of the above in one space! Everyone deserves to enhance their daily living – it's really about you choosing to do just that, by turning your outdoor living area into your own little piece of paradise.

The Bowranda™ can be installed as a roof only – Standard or Raked, with an Outdoor Roller Blind in Sunscreen Mesh or Clear PVC, providing the all around protection that you require from Sun, Wind, Rain and UV.

The advantage that Bowranda™ has over other forms of sun shading is that it's a permanent structure, strong and durable, the perfect solution for all weather conditions.

A **Lifestyle** Choice

Bowranda™ Roofs are manufactured by Unique Outdoors, a division of MCP New Zealand Limited. MCP New Zealand Limited is locally owned and operated has been proudly servicing New Zealanders for over 60 years.

Custom Outdoor Shading and Light Control with a difference, the choice is yours. Bowranda™ has a diverse range of products to extend your living areas for hot summers or enclose your outdoor space for cold winters. No matter what your needs.

Eliminates 99% of UV light without losing natural ambient light.

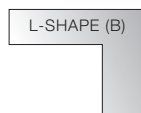

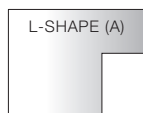

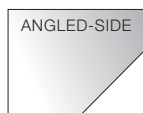

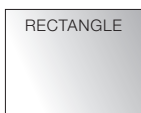

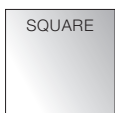

Ambient light is a natural asset. Bowranda™ eliminates harmful UV without 'darkening' your outside environment and adjacent interior.

10  
YEAR  
GUARANTEE

## Standard Roofs

Bowranda™ Standard Roofs come in Square, Rectangle, Angled-Sided, L-Shaped (A) or L-Shaped (B) as shown below. The Strong, Durable, Permanent Structure (manufactured to your bespoke specification) gives Bowranda™ Standard Roof the advantage over other forms of sun shading.

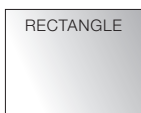

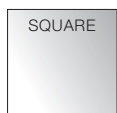

## Raked Roofs

Bowranda™ Raked Roofs come in Square or Rectangle only. The same, Strong, Durable, Permanent Structure (manufactured to your bespoke specification) gives Bowranda™ Raked Roof the advantage over other forms of sun shading.

## BOWRANDA™ ROOF FAQs

### DESIGN

- Engineered to meet Building Code 3604
- Can withstand winds up to 198km/hr
- Does not leave open faces where inclement weather can come in
- Product has been developed over many years to ensure aesthetic conformity with NZ's residential architecture

### CONSTRUCT – FRAME

- Fabricated using aluminium and powder-coated in the customer's choice of colour
- 410 Stainless steel fixings used – a hardened version of marine grade stainless steel
- Posts are 100mm square
- Frame is made of 50 x 80mm square tube
- Ten year guarantee

### CONSTRUCT – ROOF (SKIN)

- The 'membrane' for the roof comes with a 10 year guarantee
- It doesn't support the growth of mould, mildew or lichen
- Reduces solar radiant heat (providing shade relief)
- Doesn't significantly reduce ambient light, meaning it won't unduly darken the adjacent interior
- Maintains its elasticity for the life of the product – it doesn't become brittle over time unlike polycarbonate roofing materials
- Due to it being 'stretched' over the frame like a drum skin, its elasticity means brittle debris such as bird droppings will wash off in heavy rain
- It is thermally stable so it won't become loose in hot weather or too taut in cold climates
- It's tensile strength ensures it meets Building Code 3604 and can withstand high wind zones
- It is a commercial grade membrane that is used in large industrial and commercial applications (i.e. airports and transport hubs around the world)
